

YORK EBOR MEETING - 10 YEAR TRENDS

A brief summary of key trends is detailed below for each race over the four-day meeting - trends alone will not usually find winners but they may help you to draw up a short-list and then use your own skill and judgement to find that elusive winner! The figure after each race name/detail is the favourites win rate e.g. 5 wins in 10 years = 50%.

The main race of the day is also highlighted. A general draw guide is given for each race splitting the field into three parts: low, middle & high. For more comprehensive details of the draw affects please use the members only N&M Racing Club Drawfacts Data website: <http://the-nrc.weebly.com>

Only 3/10 winners at have come from a single figure draw (stalls 2/3/4). If taking into account the first four home each year a high draw has provided only 8/40 winners/placed horses with a middle/low berth best (16/40). That said a high draw I still the best for winners if not placed horses! 8/10 winners had odds of 10/1 or shorter. No maidens have won the race in the last 10 years. Draw Low 30%; Middle 30%; High 40%.

1M 'CLIPPER LOGISTICS' H/CAP (0%): 9/10 winners all carried a weight of 9st 6lbs or less. 8/10 winners last raced 6-26 days earlier. 4yo have the best record with 6/10 wins. Whilst four winners have come from the highest third of the draw when adding placed horses as well this takes to only 9/40 wins/places which is the least productive segment of the draw.
